## Curriculum

### EUROPEAN AND EURASIAN STUDIES | MA Requirements

#### European and Eurasian Studies Program Learning Goals and Objectives <sup>[24]</sup>

Entering Class 2017-2018

MA students must take the equivalent of 16 non-language courses (64 credits) in order to graduate. Those students who are approved for dual degree or advanced standing may only need to take 12 courses (48 credits) or 14 courses (56 credits) as approved by Academic Affairs.

### EUROPEAN AND EURASIAN STUDIES

MA students concentrating in European and Eurasian Studies (EES) design their own program of study to achieve fixed learning outcomes as set out in the program syllabus. These learning outcomes are evaluated in three comprehensive exams (in lieu of the Core exam requirement). The program does not have any required courses. Candidates work with their program adviser and senior faculty to plan courses and independent readings that will prepare them for the comprehensive exams.

To view the EES Curriculum Matrix, click [HERE](#) <sup>[25]</sup>.

## Track

**Russia and Eurasia Track:** Students who choose the Russia and Eurasia track within the concentration complete Comp III in this area and must achieve Russian language for proficiency.

## Comprehensive Examinations

Comprehensive exams are given three to four times per year on both campuses and are graded as pass/fail. Exams may be taken multiple times without penalty. The European and Eurasian Studies comprehensive exams are based on the [EES syllabus](#) <sup>[26]</sup> which sets out the topics and offers a bibliography for each written exam.

### Comp I: Modern European History and Ideas

The purpose of this examination is to expose EES concentrators to a broad interpretative framework for understanding the formation and evolution of the international systems of states. Students without a strong background in European history should take or audit the specialized history core course, Evolution of the International System. Students usually take this exam after their first or second semester, depending on their campus of study.

### Comp II: European Political Economies

The purpose of this examination is to make sure that students understand the essentials of governance – including economic governance – across the region. This exam encompasses the domestic political economies of the four major Western European nation states, the European Union and European integration generally, the problems of transition in Central and Eastern Europe—including Russia, and Europe’s relations with the US and global economies. Candidates take this exam before or after their third semester.

### Comp III: Europe and the World Since 1945

This comprehensive examination covers the relationship between European countries and the outside world. That relationship is both country-specific and regional. This exam has three different elements. The first concerns the international political economy, which is arguably where Europe is most influential. The second looks at the regional dimension of Europe’s relations with the outside world, and draws on the history of the North Atlantic Treaty Organization (NATO) as well as the European Union. The third focuses on the comparative foreign policies of European countries. Students usually take Comp III at the end of their third or fourth semester.

Or

### Comp III: Russian and Eurasian Studies

This comprehensive exam is designed for students in the Russia and Eurasia track. It covers the rise and fall of communism in Russia and Eurasia and allows students to focus on two of the following sub-areas: Post-Communist Politics, Post-Communist Economies, Post-Communist National Identities and Ethnic Relations, Post-Communist Civil Societies, and Post-Communist Foreign and Security Policies. Students usually take Comp III at the end of their third or fourth semester.

## INTERNATIONAL ECONOMICS

Students must complete 16 credits. The four required courses are:

- Microeconomics
- Macroeconomics (prerequisite or concurrent: Microeconomics)
- International Trade Theory (prerequisite: Microeconomics)
- International Monetary Theory (prerequisite: Macroeconomics)

If a student passes a waiver exam <sup>[27]</sup> in one of these areas, the student must take a replacement International Economics program course(s) to fulfill the concentration requirement.

Starting with the entering class of Fall 2017, students who pass Microeconomics in Pre-Term <sup>[28]</sup> will have the concentration reduced to 12 credits, but still must complete Macroeconomics, International Trade Theory, and International Monetary Theory (or a replacement course(s) if waiver exam(s) passed). The Pre-Term Microeconomics course is not for credit and is not factored into the GPA.

Beyond the requirements, many students choose to pursue an International Economics Specialization <sup>[29]</sup> in one of four areas of economics. Students may also choose to specialize in Emerging Markets <sup>[30]</sup>.

### Concentration GPA Requirement

Students must achieve a combined GPA of at least 2.67 in four (or three if Microeconomics is passed in Pre-Term) required International Economics program courses or they must retake the course(s) until a 2.67 concentration GPA is achieved. In the standard case, the concentration GPA will be the average of the grades of Microeconomics, Macroeconomics, International Trade Theory, and International Monetary Theory.

If one or more of the four standard courses is waived, the school will use the highest grade(s) from any eligible replacement International Economics program course(s) to compute the International Economics concentration GPA.

## QUANTITATIVE REASONING

Students must complete one course from the list below.

- Statistical Methods for Business & Economics
- Econometrics (prerequisite Statistical Methods for Business & Economics)
- Applied Econometrics (prerequisite Econometrics)
- Macro Econometrics (prerequisite Econometrics)
- Risk Analysis and Modeling
- Quantitative Global Economics (prerequisite International Monetary Theory)
- Credit Markets & Credit Risk (prerequisite Corporate Finance)

Students may not double-count the same course toward the Quantitative Reasoning requirement and as an International Economics concentration course and vice-versa.

If a student passes the statistics waiver exam, the student must take an alternate course from the list above to fulfill the Quantitative Reasoning requirement.

Starting with the entering class of Fall 2017, students who pass Statistical Methods for Business & Economics in Pre-Term <sup>[28]</sup> will have fulfilled the Quantitative Reasoning requirement. The Pre-Term course is not for credit and is not factored into the GPA.

## **CORE COURSES/EXAMS**

European and Eurasian Studies concentrators do not need to take any core courses/exams, but they must pass the three program comprehensive exams. EES concentrators substitute Comp I and Comp II for the core requirements in Evolution of the International System and Comparative Politics.

## **LANGUAGE PROFICIENCY**

European and Eurasian Studies MA candidates must pass exams to demonstrate proficiency in a modern European language taught at the school (English, French, German, Italian, Portuguese, Russian, Spanish). Students who select the Russia and Eurasia track must pass exams to demonstrate proficiency in Russian. All non-native English speakers are required to pass an English placement exam upon entering the school. Native speakers of a modern European language or Russian (if in the Russia and Eurasia track) must pass proficiency in a second language which can include English. Those students are encouraged to study another modern European language.

After completion of the SAIS and EES language requirements, full-time students may pursue additional European language studies and may take the following courses at Georgetown University free of charge: Advanced German, Advanced Italian, Polish, Turkish and Ukrainian.

## **CAPSTONE**

European and Eurasian Studies concentrators must complete ONE of the following capstones:

- Internship and Report. An 8-12 week summer internship between the first and second year of study, relevant to program course work. Those who complete an internship secured by the EES program are automatically approved for the report option. Those who complete internships outside the EES program should first send a note to Associate Director Kathryn Knowles for approval. The report should be 2000 Words in length, include a photo and present: 1) the content of the internship; 2) how your first year at Johns Hopkins SAIS prepared you for the experience; and 3) how the internship aided in your academic or potential career choices.
- European and Eurasian Studies Oral Exam. Candidates submit, in advance, a brief paper with a topic they are prepared to discuss. It should feature a contemporary issue in the

region, in light of its historical, institutional, political and economic settings. Participation in the non-credit current events seminar and at the various lectures on contemporary political and economic issues is a good way to prepare for the oral.

- MA Oral Exam (to compete for honors—if eligible).
