SAIS Politics & Political Economy Seminar 2018-19

“A Deep-Learning Approach for Identifying Collective Action Events from Chinese Social Media”

Jennifer Pan
Stanford University

Tuesday, February 26, 2019
12:15 – 1:45 PM

Johns Hopkins University SAIS
BOB Building, Room 736
1717 Massachusetts Avenue NW, Washington, DC 20036

Jennifer Pan is an Assistant Professor of Communication, and an Assistant Professor, by courtesy, of Political Science and Sociology at Stanford University. Her research is at the intersection of political communication, comparative politics, and computational social science. She examines how autocrats constrain collective action through online censorship, propaganda, and responsiveness. How information proliferation influences the ability of authoritarian regimes to conduct surveillance. How public preferences are arranged and formed. Pan combines experimental and computational methods with large-scale datasets on political activity in China and other non-democratic regimes to examine these questions. Her work has appeared in peer reviewed publications such as the American Political Science Review, American Journal of Political Science, Journal of Politics, and Science. Pan received her Ph.D. from Harvard University’s Department of Government in 2015. She graduated from Princeton University, summa cum laude, in 2004, and until 2009, she was a consultant at McKinsey & Company.
